PROFILE SUMMARY

To apply my software engineering skills in development, testing, design, and maintenance, contributing to innovative solutions within a motivated team. Experienced Software Engineer with a track record of developing profitable products. Skilled in PHP, Laravel, JavaScript, React.js, MySQL. Proven expertise in backend development and API design.

Work Experience

Junior Full Stack Software Engineer | [Ecomclips](#)

May 2022 - November 2023

- **Qbits ERP [Laravel, Javascript]:**
 - Designed and implemented a **user permission** module to manage specific parts of the ERP system effectively.
 - Developed a **streamlined purchase module** for raw materials, integrating **barcode scanning** mechanisms and facilitating **Excel exports**.
 - Developed a dynamic **product-building module** capable of generating **unique product serial** numbers. Implemented D-Cover **Laser for the generation of product barcode files** and dynamic **box labels with UPC and Serial barcode** files. Automated the increase in product quantity post-building process verification from the queue.
 - Established a **customer service** module that enables product **servicing and replacements** by conducting product warranty checks through product serial scanning.
 - Developed a **product disassembly** module, ensuring the proper procedure for **upgrading products** within the in-stock product warehouse.
 - Constructed a **robust report module** capable of generating comprehensive reports, including **purchase and sales reports**, with options for **daily, weekly, monthly, and yearly analysis**. Enabled the seamless export of these **reports to Excel**. Implemented a **system history log**, also exportable to Excel.

- **Qbits E-Commerce Website [Laravel, Javascript]:**
 - Built a **robust authentication** system including **login, registration, and email verification** for different user types such as **Registered, Guest, and Admin** users.
 - Developed essential e-commerce functionalities like **Add to Cart, Wishlist, Search and Filter, and Checkout**. Implemented **coupon code** usage and **product registration** features.
 - Managed all **email configurations, invoice generation, and the forget password** feature.
 - Handled different orders in the backend, including **System Orders, Marketplace (Daraz, Pickabo) orders, and Wholesale orders**. Integrated **dynamic warranty card generation** for products with serial and barcode integration.
 - .Contributed to the development of various **front-end** pages.
 - Worked on implementing the **SSL Commerz Sandbox (Test API)** for **secure payment gateway integration**.
- **eBay Template Builder (eBay product description update software by HTML template):**
 - Development of an **advanced HTML template** generator, facilitating **easy customization** of product descriptions for third-party use on eBay. Empowered customers to effortlessly **revise product descriptions** using our designed templates on **third-party sites**.
 - Regularly **updated and improved** existing **features, fixed bugs, and created new templates**.
 - Resolved various **customer issues** promptly through real-time API-based applications.
- Developed the **company's** website, **Ecomclips, Boost on Amazon and Boost on Walmart** using **PHP and Javascript**.
- Contributed to the **YOLO ERP** System utilizing **Laravel and React JS**, focused on managing the **purchase of raw materials** for **edible oil production and supply to different wholesalers**.
- Contributed to the **MatchMyTees** project, enabling the **generation** of different types of **logos** based on **customers' selected sneaker colours** and integrating these logos into **T-shirts, Hoodies, and Gym Bags** using the **Pritful API**.
- Collaborated closely with team members to **resolve issues, debug, and refactor** code.
- Managed project **databases**, ensuring **optimal design, complexity, and ease of querying** to align with client requirements.

Junior Web Developer | BIR IT
July 2021 - Dec 2021

- Contributed to developing a **Point of Sale (POS)** application, a **Spa & Beauty Saloon** software, and custom **website design** using **PHP, Laravel and React JS**.
- Worked closely with team members to resolve issues, bugs and code refactoring.

Junior Executive Intern (IT) | [Computer Source](#)
June 2019 - Sep 2019

- **E-Commerce Department Management:**
 - Take care of their E-Commerce website. Managed various tasks to ensure the website's smooth functioning.
- **Improved Search and Filter Tools:**
 - Upgraded the **search and filter** functionality for enhanced user experience and made it easier for customers to find what they were looking for.
 - Used simple but effective methods to make searching for products easier and more efficient.
- **Developed Key Parts of the System:**
 - Contributed to improving the **product module** section from the backend, making it more user-friendly and efficient.
 - Contributed to the development of the **Reports** section, making it easier for the team to understand and use data for decision-making.

SKILLS

- **Programming:** PHP, JavaScript
- **Frontend:** HTML, CSS, SCSS, React.Js, Next.Js, Bootstrap, Tailwind, jQuery, Axios
- **Backend:** Laravel, Lumen
- **Database:** MySQL, MongoDB
- **Version Control:** Git, GitHub
- **OS:** Windows, Ubuntu
- **Soft Skills:** Innovation, Decision Making, Public Speaking, Leadership

EDUCATION

Southeast University, Bangladesh / B.Sc Engineering in Computer Science & Engineering
Passing Year: 2019, CGPA 3.72
